**Additional Information**

If testing for a disease or a disorder was performed and results indicate the animal is affected or at risk, we recommend contacting your veterinarian for further clinical evaluation and for additional information on disease and management.

For more detailed information on GSD IV test results, please visit our website at:  
[www.vgl.ucdavis.edu/services/cat/GSDIV.php](http://www.vgl.ucdavis.edu/services/cat/GSDIV.php)

The GSD test is specific for the GSD IV genetic defect that has been identified in Norwegian Forest Cats.

For terms and conditions of testing, please see [www.vgl.ucdavis.edu/about/terms-and-conditions](http://www.vgl.ucdavis.edu/about/terms-and-conditions)

Results are determined using PCR-based methods. The results relate only to the sample tested as identified by the submitter (for example, identity and/or breed).
